

Bid documents were distributed to 14 general contractors. Bids were opened on July 2, 2009. Texas Solar Power Company submitted the lowest of five bids received. The amount of the contract is larger than the base bid amount shown below, as the contract incorporates two alternate bid items. The base bid is to provide a turn-key 100kW system. The first bid alternate incorporates infrastructure for an additional 36kW of solar power without the actual solar panels. The second bid alternate incorporates the additional panels. Accepting the base bid and the two alternates provides a complete 136kW system.

TEXAS SOLAR POWER COMPANY, Austin, TX	\$443,250.64
MERIDIAN SOLAR, INC., Inc., Austin, TX	\$502,513.22
STANDARD RENEWABLE ENERGY COMPANY, Austin, TX	\$540,183.00
CEI ROOFING-TEXAS LLC, Austin, TX	\$640,000.00
